CARATTERISTICHE TECNICHE

Il portfolio colori Pratic si ispira alle nuance della natura per creare una raffinata armonia in qualsiasi contesto ambientale e architettonico. Desaturazione ed eterogeneità sono le caratteristiche dei pigmenti selezionati in collaborazione con prestigiosi studi di architettura e di design.

Nel 2018 Pratic ha realizzato un impianto di verniciatura all'avanguardia e a basso impatto ambientale:

- no solventi e composti volatili organici
- polveri con grado di recuperabilità del 100%
- impianto dotato di un depuratore che recupera il 97% dell'acqua utilizzata

CERTIFICAZIONE QUALICOAT

Il pre-trattamento Qualicoat Seaside offre eccellenti prestazioni di tenuta del colore ed elevati standard anti-aging:

- maggiore resistenza ai raggi UV e maggiore brillantezza del colore nel tempo
- maggiore resistenza alla salsedine, utile nelle zone vicine al mare
- maggiore resistenza all'umidità
- facilità di manutenzione e di pulizia
- il pre-trattamento unito alle prestazioni delle polveri in classe 2 raddoppia la durata di brillantezza rispetto alla classe 1

TECHNICAL FEATURES

Pratic's colours portfolio gets inspiration from the nuances of the nature aiming at creating a refined harmony in any environmental and architectural context. Desaturation and heterogeneity are the distinctive features of the pigments selected in collaboration with prestigious architecture and design firms.

In 2018 Pratic has built an avantgarde environmentally-friendly coating plant:

- no solvents and volatile organic compounds
- powders can be reused by 100%
- the system is equipped with a purifier that reuses 97% of the water

QUALICOAT CERTIFICATION

The Qualicoat Seaside pretreatment offers excellent performances of color fastness and high anti-aging standards:

- higher resistance to UV rays and longer color brightness over time
- higher resistance to salt, that is useful in the areas nearby the sea
- higher resistance to humidity
- simple maintenance and cleaning
- the pretreatment together with the performances of class 2 powders redoubles brightness duration compared to class 1

TECHNISCHE EIGENSCHAFTEN

Das Pratic Farbportfolio ist von den Nuancen der Natur inspiriert, um einen auserlesenen Einklang in jedem Umgebungs- und Architekturkontext zu schaffen. Entsättigung und Ungleichartigkeit sind die Eigenschaften der Pigmente, die in Zusammenarbeit mit renommierten Architektur- und Designbüros ausgewählt wurden.

Im Jahr 2018 hat Pratic eine topaktuelle, umweltfreundliche Lackieranlage gebaut:

- keine Lösungsmittel und flüchtige organische Verbindungen
- Pulver mit 100% Rückgewinnungsgrad
- Anlage, die mit einem Reinigungsapparat ausgestattet ist, welchen 97% des verwendeten Wassers wiedergewinnt

QUALICOAT ZERTIFIZIERUNG

Die Qualicoat Seaside Vorbehandlung bietet eine hervorragende Farbbechtheit und hohe anti-aging Standards:

- höhere Beständigkeit gegen UV-Strahlen und höhere Farbbrillanz im Laufe der Zeit
- höhere Widerstandsfähigkeit gegen Salz, nützlich in Gebieten in Meeresnähe
- höhere Beständigkeit gegen Feuchtigkeit
- einfache Wartung und Reinigung
- die Vorbehandlung, mit der Leistung von Pulvern der Klasse 2 kombiniert, verdoppelt die Glanzdauer im Vergleich zur Klasse 1

CARACTÉRISTIQUES TECHNIQUES

Le portfolio couleurs Pratic s'inspire aux nuances de la nature pour créer une harmonie raffinée dans n'importe quel contexte environnementale et architectonique. Désaturation et hétérogénéité ce sont les caractéristiques des couleurs sélectionnées en collaboration avec de prestigieux bureaux d'architecture et de design.

En 2018 Pratic a construit un système de laquage à l'avant-garde et à faible impact environnemental :

- pas de solvants et de composés volatiles organiques
- poudres avec degré de récupération de 100%
- système équipé d'un épurateur qui récupère 97% de l'eau utilisée

CERTIFICATION QUALICOAT

Le pré-traitement Qualicoat Seaside offre d'excellentes prestations de tenue de la couleur et des hauts standards anti-âge :

- meilleure résistance aux rayons UV et meilleur éclat de la couleur dans le temps
- meilleure résistance au sel, ce qui est utile dans les zones à proximité de la mer
- meilleure résistance à l'humidité
- facilité d'entretien et de nettoyage
- le pré-traitement en combinaison avec les prestations des poudres en classe 2 redouble la durée de l'éclat par rapport à la classe 1

CARACTERÍSTICAS TÉCNICAS

La gama de colores de Pratic se inspira en los matices de la naturaleza para crear una refinada armonía en cualquier contexto ambiental y arquitectónico. Desaturación y heterogeneidad son las características de los pigmentos seleccionados en colaboración con prestigiosos estudios de arquitectura y diseño.

En 2018, Pratic construyó una planta de pintura de vanguardia y de bajo impacto ambiental:

- sin disolventes ni compuestos volátiles orgánicos
- polvos con un grado de recuperabilidad del 100 %
- planta dotada de una depuradora que recupera el 97 % del agua utilizada

CERTIFICACIÓN QUALICOAT

El pretratamiento Qualicoat Seaside ofrece unas excelentes prestaciones de solidez del color y elevados estándares antienviejimiento:

- mayor resistencia a los rayos UV y mayor brillo del color a lo largo del tiempo
- mayor resistencia a la salinidad, útil en las zonas cercanas al mar
- mayor resistencia a la humedad
- fácil mantenimiento y limpieza
- el pretratamiento, unido a las prestaciones de los polvos de clase 2, dobla la duración del brillo con respecto a la clase 1
